Ok Google, Turn on my fire

About Us

Flame-tec is a USA company, uniquely positioned to bring innovation to the hearth and barbecue industries. The company's management team is comprised of recognized experts in gas engineering, electrical engineering, app development and manufacturing. With many years involvement in all aspects of the fireplace and grill business, Flame-tec has broad insight into consumer demands and industry trends.

Known for quality and support, many recognized brands rely on Flame-tec to provide their key components. Manufacturers, retailers and consumers can all depend on world class customer service and warranty support.

Smart device control is recognized as the new platform of 'On/Off' control in the Hearth and BBQ markets and Flame-tec is the market leader in total smart device control of all leading brands. Talk to us about how we can make you 'smart'.

The award winning FireBug is the smallest control system on the market. Packed with features such as battery health monitor, multiple device control and much more.

FireBug

- World's Smallest Control System
- Works With 3v Coin Cell Battery
- Battery Health Monitor
- Control With Multiple Smart Devices

works with **Millivolt | IPI**

Alexa

- Voice Control Your Fireplace
- Alexa Echo, Dot Or Other Alexa Device Required
- WiFi | Bluetooth Hub Required
- Program Routines, Timers etc

WORKS WITH **amazon alexa**

Google Assist

- Voice Control your Fireplace
- Google Home or other Google Voice Product Required
- WiFi | Bluetooth Hub Required
- Voice Command Your Fire From Your Smart Device With Google Assist

works with **Google Assistant**

Firebug

The FireBug has changed the way millivolt and IPI fireplaces are controlled. The FireBug may be small but it is packed with features.

AWS Cloud

- Commercial Grade Cloud Platform
- Amazon USA Based Server For Extra Security
- Data Analytics For Devices If Desired

iOS

- ON/OFF Control
- Battery Health Monitor
- Fire Status
- 7 Day Pilot On Time Notification
- Works With iPhone, iPod And iPad

Android

- ON/OFF Control
- Battery Health Monitor
- Fire Status
- 7 Day Pilot On Time Notification
- Works With Android 6.0 And Above

The original fireplace smart remote control is a industry favorite, with its simple On/Off button and modern design. The IF20 isn't just an On/Off remote control.

IF20

On/Off control

AAA battery for Remote | AA for Receiver

RF Control

Pre Programmed Out Of The Box

Alexa

Voice Control Your Fireplace

Alexa Echo, Dot Or Other Alexa Device Required

WiFi | Bluetooth Hub Required

Program Routines, Timers etc

Google Assist

Voice Control your Fireplace

Google Home or other Google Voice Product Required

WiFi | Bluetooth Hub Required

Voice Command Your Fire From Your Smart Device With Google Assist

works with
Millivolt | IPI

WORKS WITH
amazon alexa

works with
Google Assistant

The IF20 is packed with features such as temperature control and battery health. The IF20 works with millivolt and IPI systems.

AWS Cloud

CPC

Cross Platform Compatibility is the premium platform for controlling all brand fireplaces or firepits. Connecting fireplaces to smart devices can be time consuming and inconvenient. The App solves the connectivity to a traditional control system with a smart designed platform that makes connecting a breeze, even your technically challenged customers can do it!

Most fireplace and firepit brands will connect easily to the app and offer a seamless experience across all appliances. No need to switch apps between units.

It doesn't matter what brand fireplace you distribute or offer your customers as the connection experience is the same.

The i-Flame app connects your fireplace to CPC.

Cross Platform Compatibility

Ultimate Control

The i-Flame app brings your fireplace to life and makes it smarter by simply using your smart device, Alexa and Google Home. You can now control your fireplace from anywhere around the world, you can talk to it, and you can even know the battery health of your control system. Imagine setting the temperature of your fireplace from any connected device, no matter where you are. The app provides the status of your fire and also can remind you when your 7 day pilot on time is about to expire so you will never have a pilot light extinguish at inconvenient times.

The i-Flame app works with Bluetooth 4.0 for maximum security as well as a cloud based server by Amazon AWS giving you the peace of mind commercial grade control.

Dealer Program

FirePro™

Become a certified FirePro dealer and enjoy the benefits of the CPC platform. Benefits of the program include training, online support, phone support, point of sale material, latest technology to brands you promote, exclusive offers and knowing you are ahead of your competitor with the latest smart controls in the industry.

FirePro professionals can also brand their own app so you can stand out and promote your brand and business.

FirePro Dealers are provided training from the Flame-tec team for smart control integration for all brands of fireplaces and fireplace controls.

Customer support is also provided through Flame-tec if required.

The image shows a smartphone displaying the 'Smart Fireplace' app interface. The screen features a central flame icon, two temperature gauges (76 and 81), and control buttons for 'On', 'Off', 'Battery', and 'Settings'.
